

# Peer Support Group Community Survey

## We need your help!

We are the FIMR Community Action Team, we are a group working together to help improve the health of communities, families, and babies. We do this by talking to families about their experiences surrounding pregnancy & infant loss and creating community action from what we learn from them. We are currently working on creating virtual peer-led groups for both expecting parents and families who recently had a baby. We want to create a safe place where families can come together and have their questions answered and feel supported.

## Your Voice Matters!

We would like to hear from you if you are currently pregnant, have been pregnant recently or may be thinking about raising a child in the future. Please take a couple of minutes to answer the following questions about the pregnancy/early parenthood groups we are starting.
